Ashabi Oduntan, Junior Frontend Developer

developerqueenlatifa@gmail.com

PROFILE

As a self-taught, entry-level frontend engineer, I'm keen on leveraging real-world experience to further hone my skills in delivering user interfaces optimised for visual appeal, cross-platform adaptability and inclusive usability.

PROJECTS

Ashabi's Pie Shop

May 2021 — Jun 2021

An e-commerce website where customers can make purchase orders for a variety of pastries.

(Visit https://oloriasabi.github.io/Ashabi-s-Pie-Shop)

- Designed and developed look and feel using HTML, CSS and Javascript
- Leveraged Bootstrap's grid system for the layout of the website
- Ensured a responsive design by leveraging CSS media queries
- Version controlled source code changes using Git
- Hosted on the web using GitHub Pages

Cocktail Website

Jun 2021 — Jul 2021

A website built to showcase various delightful cocktails.

(Visit https://oloriasabi.github.io/cocktail-app)

- Designed and developed look and feel using HTML, CSS and React.js
- API integration in React.js to fetch data
- Used Javascript events to manipulate elements depending on user interactions
- Ensured a responsive design by leveraging CSS media queries
- Version controlled source code changes using Git
- Hosted on the web using GitHub Pages

Dashboard Website

Oct 2021 — Nov 2021

An Angular based visualisation dashboard for randomly generated data.

(Visit https://oloriasabi.github.io/Dashboard-app)

- Designed and developed look and feel using HTML, Bootstrap/SCSS and Angular
- Used Angular Material, FlexLayout and HighCharts to display data
- Version controlled source code changes using Git
- Hosted on the web using GitHub Pages
